DPO assigned

The common challenges our clients faced

No room for documents and expensive, overloaded workspaces

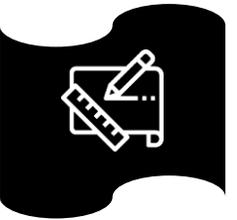

Lack of qualified personnel and appropriate technology

Premises and repositories not adapted for document storage

Insurance not offering coverage in the event of a disaster

Inefficient tools for searching for information

Hard to achieve regulatory compliance

Instant improvements and long-term solutions **achieved**

Outsourcing document and information management **unifies and preserves the strategy in organisation** and classification of information

Pinpoint and preview a specific document **among millions**

Minimum to none additional time and financial investment in backing up of data

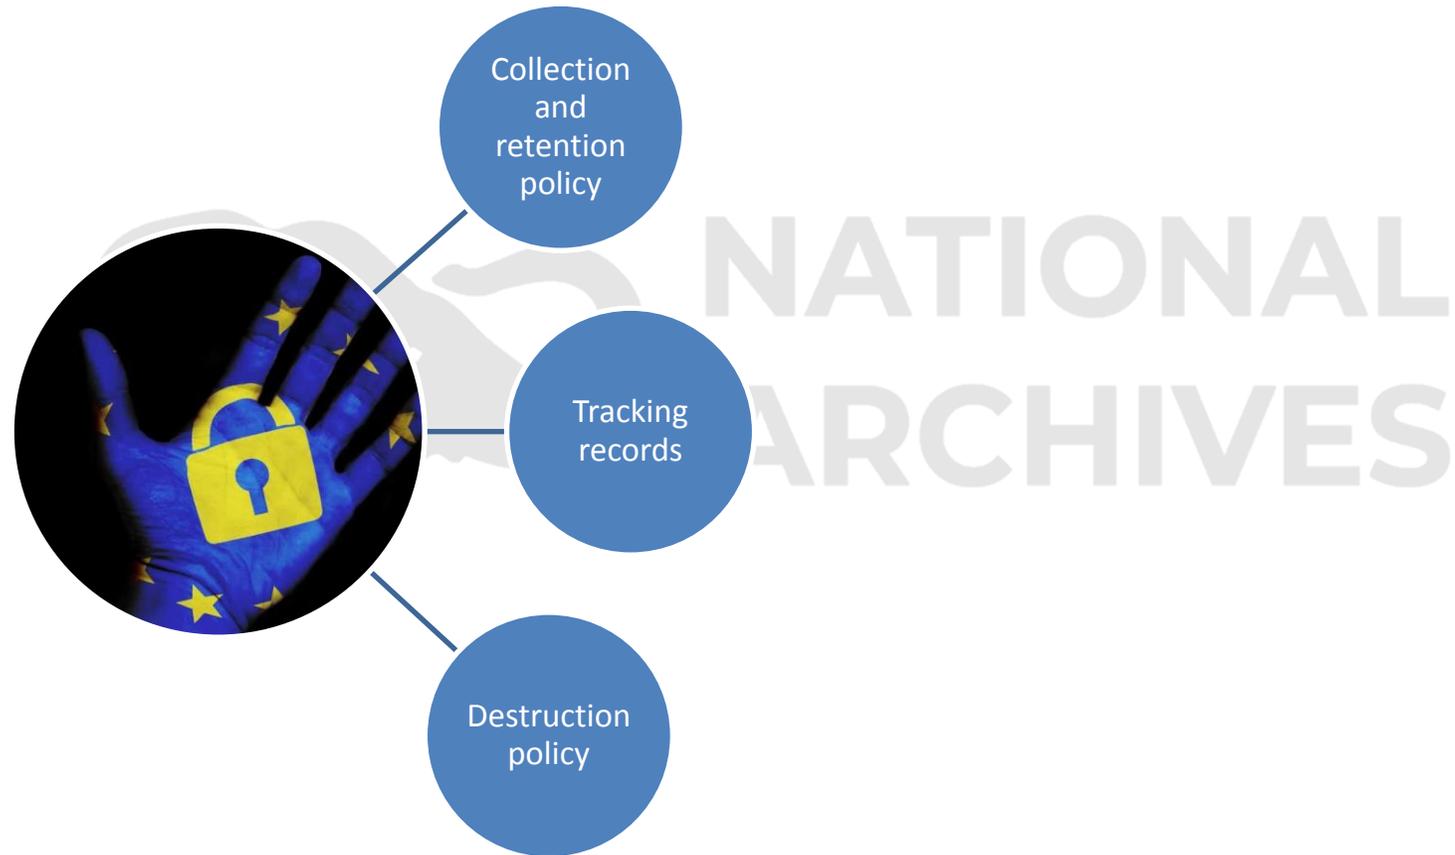

High level of information security while **retaining interstructural** classification.

High quality scanned copies with small file size which **reduce demand for infrastructural scaling**

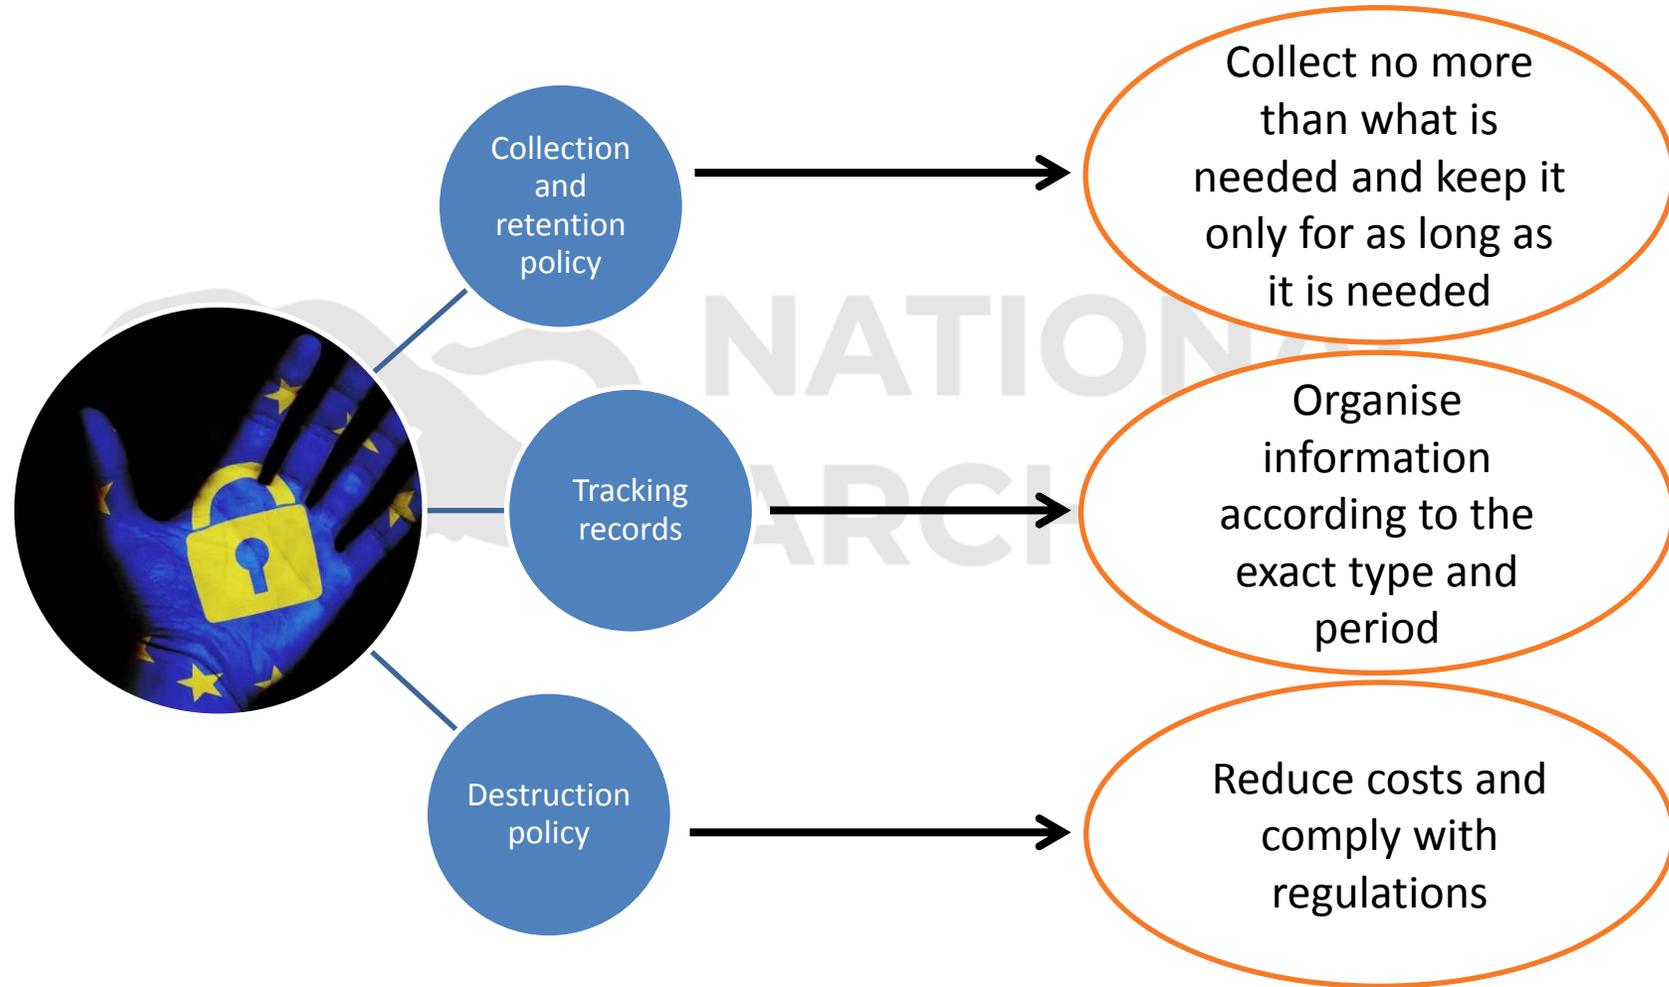

State-of-the-art **security controls**, good practices on **confidentiality and access control** and **GDPR compliance**

Additional challenges after GDPR

Additional challenges after GDPR

Technology and software development

Entirely web-based

Fast and flexible search and filtering tools

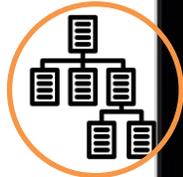

Friendly and intuitive user interface

Powerful export

Tailored to your structure

Allows for analysis of growth trends of the documents

Technology and software development

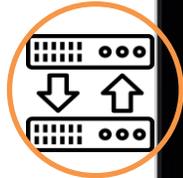

Input data validation

Secure communication
via modern encryption

Collocated servers assure
business continuity

Regular backups

Rolling updates with no
downtime

Penetration testing
done by professionals

Pain points solved

Minimize concerns about the protection of valuable assets

Optimise established archiving practices

Speed up the access to concrete information

Help comply with regulations

More than 150 local and international companies from different economic sectors have already trusted us. They have changed the way they store, access and manage information and cut archiving costs by nearly 50%.

„We have specific requirements for our documents related to clinical studies as they need to be stored in approved premises, conforming to relevant standards. We have them perfectly met.“

„The newly implemented organisation helps our employees to fully concentrate on our main business.“

„The specific, responsible and professional work from National Archives did not go unnoticed by our daughter company Bulstrad Life VIG which also trusted their documents for managing and secure storage.“

„Our main priorities are confidentiality and quick access to exact information whenever we need it.“

„Quick reactions and feedback lead to tremendous optimisation of document workflow with regards to operations, administration and logistics.“

Partners

A cybersecurity company, founded in 2014 in California. They provide services which allow customers to understand their vulnerabilities prior to an actual breach. In 2017 they started to offer the first services related to Regulation (EU) 2016/679 (GDPR).

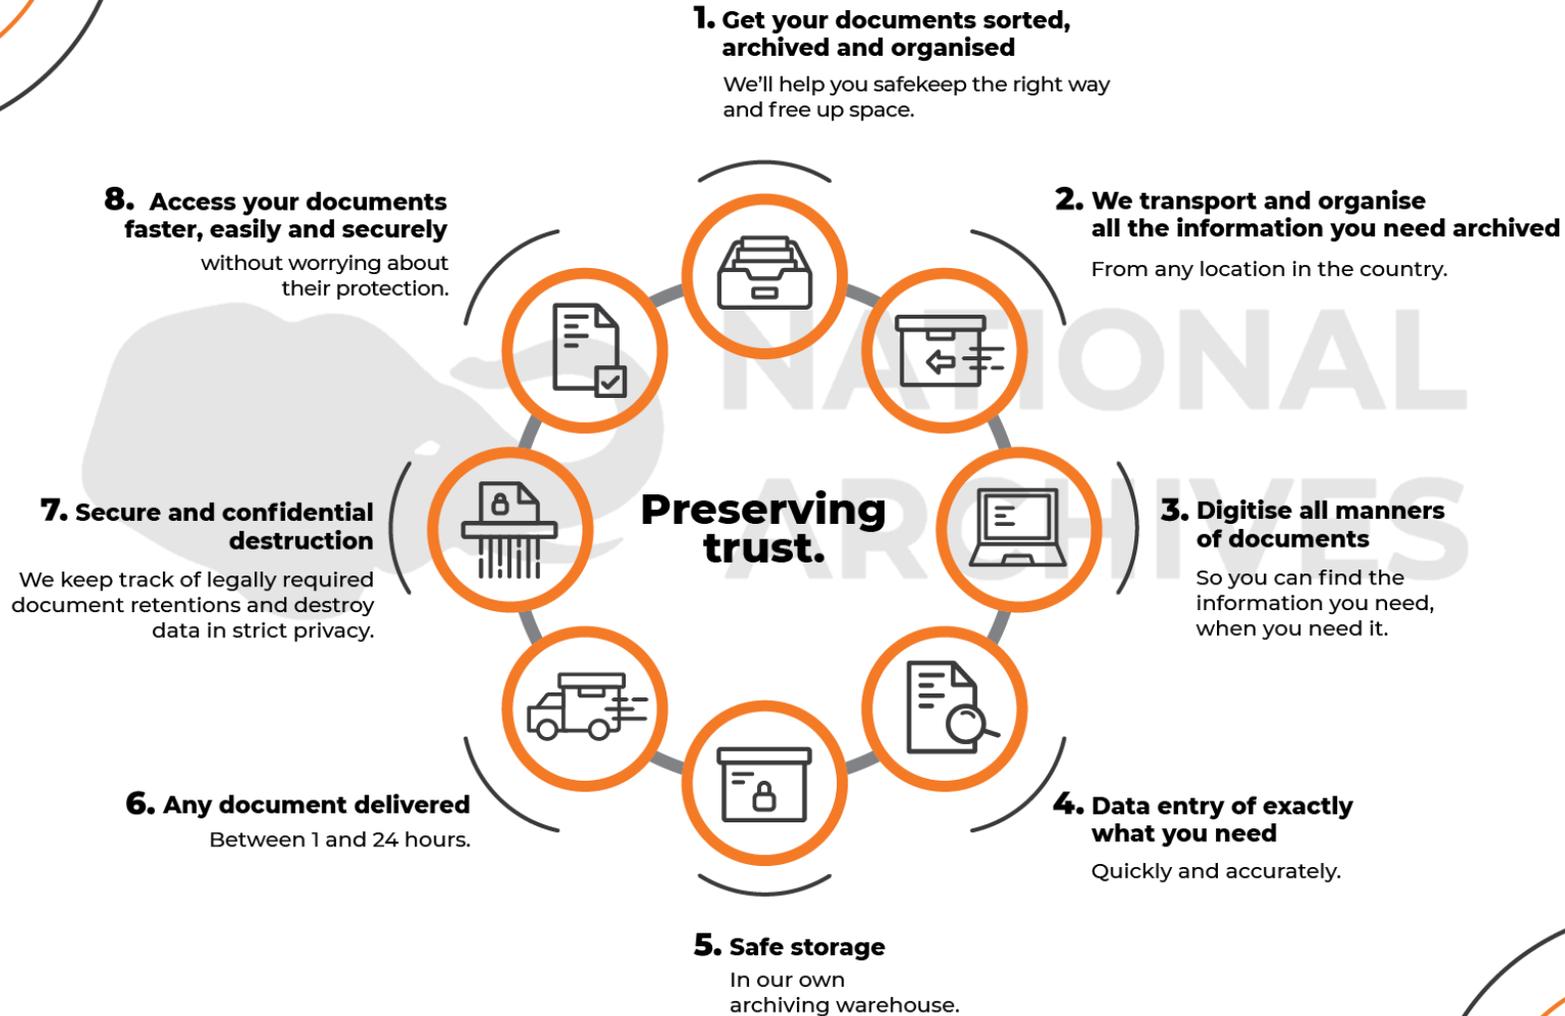

Lloyd's Register is a world leader in independent assessments, including certification, validation, verification and training across a wide range of standards and schemes, with recognition from more than 50 accreditation bodies.

Leading Bulgarian educational institution in library studies and information technologies.

Every solution for your archive

Thank you for your time and attention!
